

Young Bees Hive

The new additional Hive made of hard foam is available in white or painted. Weighs 3,5 Kilos.

A new development from **APIDEA**. The new young bees hive contains a maximum of eight breeding chambers. The warm and light transportable box allows you to easily rear the bees.

For the additional breeding chambers a queen breeding spinal column is incorporated. The box can serve equally serve both purposes. Thanks to simple use the hard foam box proves itself to be also the ideal beginner box.

Without difficulty this allows a swarm of bees to establish themselves and feed.

Formic Acid Dispenser

The **APIDEA** Acid Dispenser provides a simple and effective deterrent for ants and such insects.

Easy to control through marked paper which gradually evaporates.

The **APIDEA** dispenser can be reused several times.

Additional material

For the **APIDEA** Formic Acid Dispenser.

Mating Hive

The cubic-formed hive, made of brown hard Styrofoam, provides perfect conditions for a warm environment including a good stacking system. This hive is easily transportable and simple to clean.

The hive is equipped with three attachable brown honeycomb compartments made of plastic, a transparent inner lid with entrance slot for the queen's cage.

Cover with recesses allowing for the roller gage, removable base, front panel and feeding station. The non-slip feeding station comes with an air grill and two queen excluders.

Breeding Chamber

Along with the new APIDEA breeding chamber combined with the APIDEA mating hive and the APIDEA feeding station you can look after without difficult your young queen bees for several weeks in the reversed area.

Additional parts

To extend the hive APIDEA offers always additional parts.

Feeding Station

With the new feeding station for the APIDEA mating hive you can hold your fertilizer queen bees in reserve. The mating hive is equipped with five compartments including the feeding station. This can be filled with 1,2 Kilos of feed paste. This way you can keep your queen bees for longer in your hive.
